

Reference Layout for nPM1300-QEAA

Config 3: Minimal – only battery charging and VSYS output

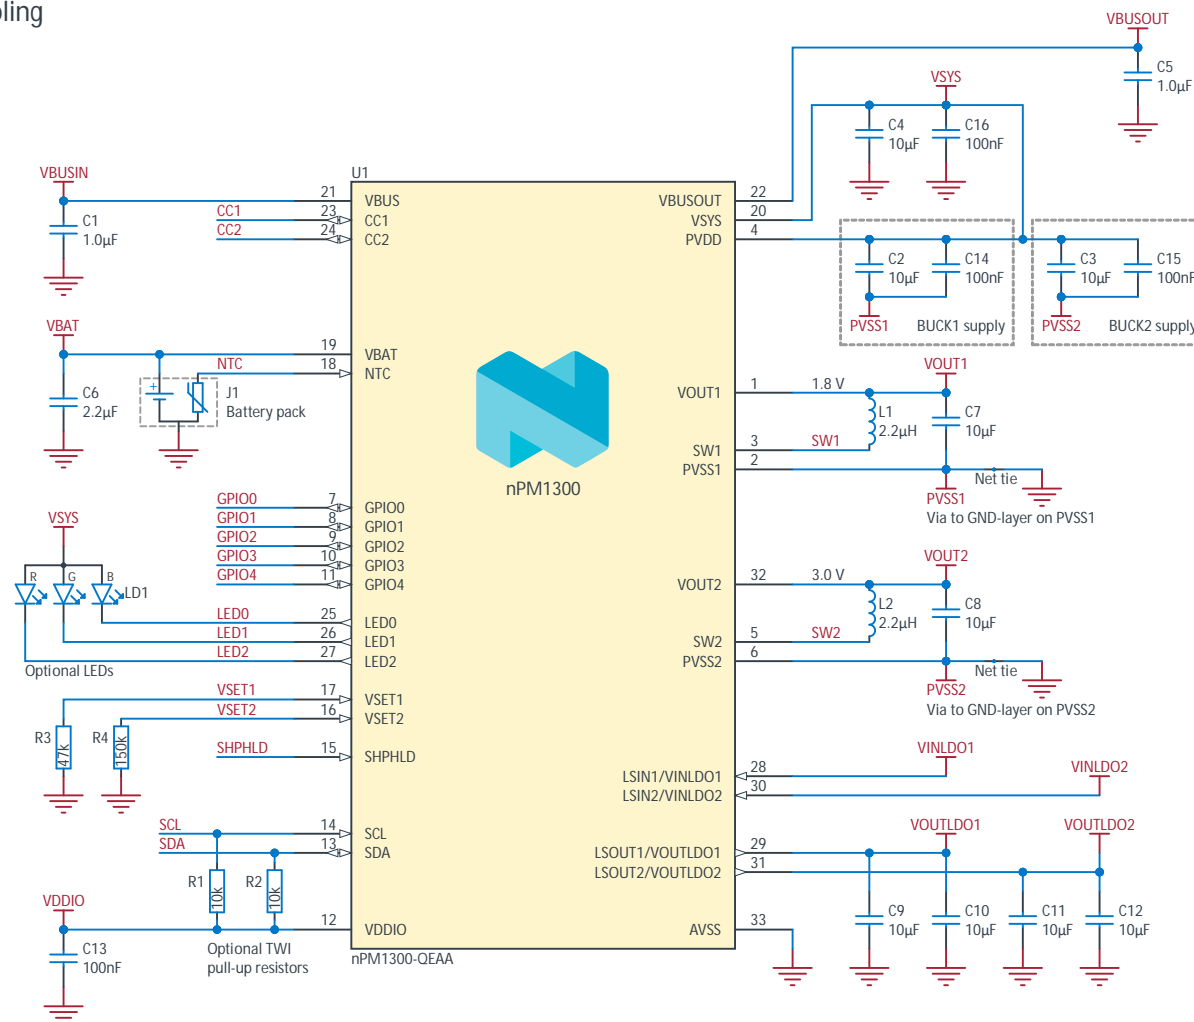

Nordic Semiconductor does not warrant the accuracy or completeness of this documentation or any included information. Nordic Semiconductor makes no assurances that this design will meet specification, be appropriate for your application, or fit for any particular purpose, or that it will function in an implementation. Nordic Semiconductor also does not claim that the design is ready for production. It is your responsibility to thoroughly validate and test your design implementation to confirm the functionality of your application.

Title Minimal – only battery charging and VSYS output			
Size A4	Config. No. 3	Device nPM1300-QEAA	Revision 1.2
Date: 2025-06-05			Sheet 1 of 1
File: npm1300_qeaa_config3.SchDoc			Drawn By: EISK
Classification: PUBLIC			

Config 4: Full + High frequency decoupling

▲ Designer note:
C14, C15 and C16 are
additional high frequency
capacitors for improved
decoupling in designs
meeting stricter EMC
requirements.
